

Commercial Solutions

Contemporary Window Treatment Systems

The Silent Gliss Success Formula

When the company was founded in 1952, Silent Gliss presented the world's very first silent curtain track system. Further innovations followed, like bendable tracks for corner windows and the first electrically-operated curtain systems. Silent Gliss owes its lasting success to three core principles: innovation, quality and service.

Put us to the Test

As a leading global supplier of high-end window treatment systems, Silent Gliss sets new benchmarks. That means that you can expect much more from us.

From the outset, our experts will advise you on the functional, aesthetic, acoustic, flame-retardant and light-resistant aspects of your project. Selecting the right system, solving technical challenges, taking measurements on your premises, fitting and maintenance are all just part of the service provided by Silent Gliss.

World's First Silent & Bendable Panel Glide System

The new panel glide generation from Silent Gliss provides totally smooth and silent gliding of panels using sophisticated roller gliders. With "Flex", it also offers the first bendable system, enabling unprecedented solutions for stylish and unobtrusive applications.

Elegance à la Carte

It's not just the Silent Gliss materials, craftsmanship and lasting value that are top class; it's the presentation too.

Soundless motorised systems guarantee a tranquil ambience, while the manual override function prevents damage from manual operation. Products such as Vertical Waves or Wave XL allow you to add those exclusive touches too.

Monte-Rosa Lodge, Zermatt, Switzerland

The new Monte-Rosa Lodge showcases the best of Swiss architecture. Set in a unique location, in an extremely cold environment the ecological concept behind this project is certainly progressive. The project is highly innovative with a strong sense for aesthetics. Silet Gliss roller blinds are installed throughout.

System:
Roller Blind Systems Silent Gliss 4820

Fabrics:
Multiscreen 5%, 0707

Kruisheeren Hotel, Maastricht, The Netherlands

This erstwhile 15th Century monastery enchants its guests with a unique blend of Gothic architecture and streamlined, modern interiors. The elegant combination of two roller blind systems provides practical screening and glare protection.

Roller Blind Systems Silent Gliss 4810

Healthcare

anti-bacterial | washable | flame-retardant |
practical

Comfortable Care

An understated yet appealing solution that is hygienic, helps create pleasant conditions and offers fire protection – it's the ideal combination.

Colorama Bioactive, an anti-bacterial material that meets the most stringent demands, is the best example for such a solution. In addition to flexible room divider systems, Silent Gliss also offers solutions for waiting rooms, surgeries, operating theatres, patients' rooms and offices.

Top Performance Every Day

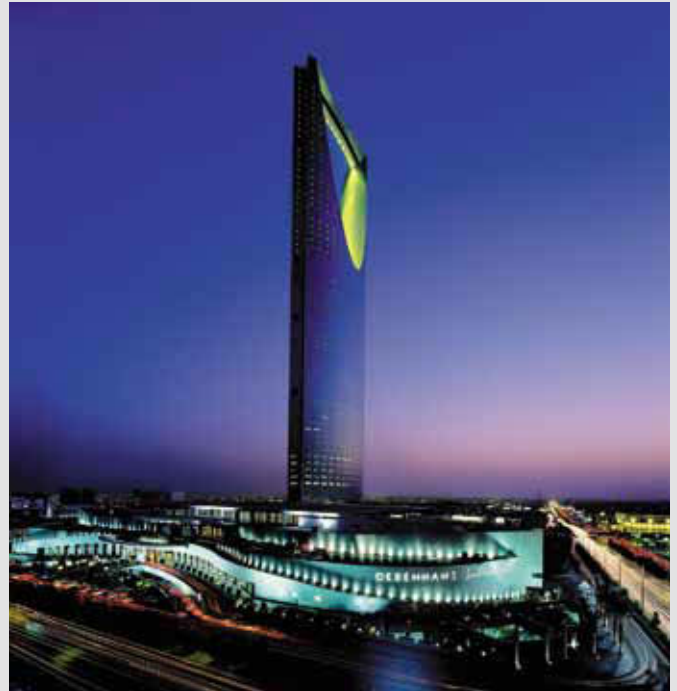

A good working environment is the key to performance and motivation.

To guarantee perfect screening and glare protection from start to finish of every working day, Silent Gliss takes into account the relevant solar coefficients of all its fabrics.

Multi-functional products like Wave also make significant improvements to acoustics in offices and conference rooms.

L'Oréal, Oslo, Norway

The interior designer had a tricky problem to solve with the relocation of the L'Oréal showroom: natural light in the new premises had to be adjusted to allow catwalk shows and product presentations during the day. The combination of two modern Silent Gliss skylight systems proved the ideal solution for darkening the former locomotive factory that dates back to 1860.

Panel Glide System Silent Gliss 2700 and Vertical Blind System Silent Gliss 2810 with Vertical Waves

Fabrics:

Colorama 1 and 2, Visiotex

Public Buildings

robust | automated | large-scale | noise-reducing

Space for Unimaginable Opportunities

System size and stability take on greater importance in public places. Silent Gliss has the leading technology for large-scale screening and anti-glare systems, together with the necessary experience.

As a result, materials are tested on all systems to optimise their drape. Automation and electrical operation provide a simple and reliable solution, even for the most difficult places to access.

University Ca' Foscari, Venice, Italy

Even in Venice, where architectural highlights abound, the historical palace of Ca' Foscari is considered a jewel. This presented the architect with quite a challenge: how to integrate a modern system providing shade from the sun and covering the huge windows, without spoiling the appearance of the palace. He found the ideal solution in the various Silent Gliss roller blind systems.

Excellent Service

The difference between good and excellent service lies in attention to detail. That is why Silent Gliss places great emphasis on fulfilling its customers' requirements, without settling for compromise.

Initial Consultation

Distance is no object when it comes to individual consultation at your premises or taking precise measurements for that perfect solution.

Installation

Silent Gliss and its official partners only appoint trained professionals to supply and install our tailor-made systems.

After Sales Assistance

Silent Gliss offers a professional and reliable after sales service.

Guarantee

Silent Gliss provide a 5 year guarantee on all products, including motorised systems.

Round the Clock, all over the World

You can find the entire Silent Gliss range on the internet, including all the latest products. Our web-site is packed with useful additional information. You can download the latest brochures and view the film/photo gallery. Visit us and be inspired.

Sustainability

In Silent Gliss' Vision of sustainability, a product is manufactured in an environmentally friendly, safe and socially responsible manner. Not only does it help to improve the quality of indoor living and working, it also plays an important part towards energy saving in buildings.

Our Vision of sustainability is based on four elements:

Sustainable Management

Silent Gliss as a family owned company has and will always focus on the sustainable growth of its business, based on the balance between economical, ecological and social elements.

Sustainable Products

Our products contribute to sustainable buildings by effectively managing natural daylight, enhancing interior comfort, increasing occupant productivity and reducing energy consumption.

Sustainable Processes

Silent Gliss constantly work on optimising production processes with the emphasis on the prevention and reduction of waste. Whenever possible we recycle/reuse our materials.

Social Responsibility

For Silent Gliss it is self-evident that all current regulations are met or exceeded and that everyone involved in the production process is treated and compensated fairly.
